**nodejs-github-bot** added `assert` `needs-ci` labels

on Apr 27

```
import assert from 'node:assert';
const tracker = new assert.CallTracker();

function func() {}

// callfunc() must be called exactly 1 time before tracker.verify().
const callfunc = tracker.calls(func, 1);

callfunc();

// Calls tracker.verify() and verifies if all tracker.calls() functions have
// been called exact times.
process.on('exit', () => {
  tracker.verify();
});
```

## assert: deprecate callTracker #47740
