test_runner: add shards support

✓ a93fa41

Labels

@erickwendel_

--test-shard

Test suite shard to execute in a format of `<index>/<total>`, where

`index` is a positive integer, index of divided parts `total` is a positive integer, total of divided part
This command will **divide all tests files into `total` equal parts**, and will run only those that happen to be in an `index` part.

For example, to split your tests suite into three parts, use this:

```
node --test --test-shard=1/3
node --test --test-shard=2/3
node --test --test-shard=3/3
```
