

```
import { createServer } from 'node:http'

const server = createServer((req, res) => {
  res.end('Hello world!')
})

server.listen(0)

server.once('listening', () => {
  const { port } = server.address()
  console.log(`Server is listening on port ${port}`)
})
```

@erickwendel_

```
import { createServer } from 'node:http'

const server = createServer((req, res) => {
  res.end('Hello world!')
})

server.listen(0) // will find an available port for you

server.once('listening', () => {
  const { port } = server.address()
  console.log(`Server is listening on port ${port}`)
}) // Server is listening on port 65017
```
